

Luke A. Crader, O.D.

Revised January 2018

OptoMap Retinal Screening

The OptoMap is a Retinal Health Screening that Denton Optometry is excited to offer. It is an alternative to having your eyes dilated in most cases. The OptoMap provides the doctors with a panoramic view of the retinal and optic nerve. Sight threatening diseases such as diabetes, hypertension, macular degeneration, retinal detachments and glaucoma are more readily diagnosed with this new technology. As with all medical conditions, the earlier problems are detected, the easier they are to treat. The OptoMap is another advancement in our efforts to provide our patients with the latest technology in eye care.

The OptoMap is not covered by insurance. The fee for this important screening is \$35.00.

Thank you in advance for your understanding,
Denton Optometry Doctors and Staff

I have read the above information and understand the importance of the OptoMap Retinal Screening and agree to have the screening performed:
